

## Global Marketing Firm Cuts Costs by Connecting with hSo

---

### Customer Profile:

Headquartered in London, leading international marketing and communications organisation Huntsworth, has 78 offices worldwide with over 2000 employees. The group benefits from a wide range of skills and continues to develop its worldwide capabilities to meet the demands of large global organisations.

### The Challenge:

Seven offices located across London required seamless connectivity to enable 500 employees high availability to centralised databases, email, and Internet connectivity. The service also needed to be installed whilst causing minimal disruption to the day-to-day office activity.

Huntsworth's Head of IT, Matt Roberts explains: *"We were looking for a managed service that could provide maximum reliability with minimum downtime at a cost-effective price. No disruption to business in the change-over period was also a key requirement."*

### The Solution:

Integrated communications provider hSo installed hSo:CONNECT, a managed bandwidth service, using 'point-point' Ethernet connectivity. hSo:CONNECT joined the seven disparate sites to create the impression of one seamless office.

hSo:CONNECT offers bandwidth options from 1 Mbit/s to 100 Mbit/s over standard fast Ethernet connections with no throughput limitation or monthly traffic allowances.

### The Benefits:

Huntsworth has been able to make considerable savings just by undertaking the simple procedure of changing the billing from BT, their previous service provider, to hSo.
