Network services from hSo

Your network is critical

In the world of Cloud computing, the robustness of your network has never been more important. Using our robust platform ensures your employees can access business applications anytime, anywhere.

We at HighSpeed Office (hSo) are carrier independent, i.e. we work with all major UK network operators. Coupled with the use of our own core network, we can deliver you a reliable, carrier diverse, end-to-end MPLS solution.

hSo works with all proven circuit technologies to create the most cost effective solution for your specific needs.

That's your Lot 1

Thanks to our record of successfully implementing managed solutions, the CCS awarded us for all four categories we applied for on the Network Services framework (RM1045). For network services, find us under our full name (HighSpeed Office) on **Lot 1 – Data Access Services** of the framework. We offer three main types of network services:

- **End-to-end data access services**
- **WAN and ISP services**
- **Point-to-Point connectivity**

The hSo MPLS WAN

Our innovative MPLS network platform is the foundation of our services. It lets us provide a reliable service for WAN design, implementation, management and monitoring. Enjoy our cost-effective, end-to-end MPLS solution.

Solutions enabled by our network

- **Internet Access** – fastest Internet ports with global and national interconnects
- **IP Telephony** – SIP Trunking services including ISDN replacement and competitive call tariffs
- **IP Communications** – hosted and on-premise IP PBX and collaboration platforms
- **Email Security** – Cloud-based email scanning and filtering
- **Broadband and PSTN** – teleworker solutions for unified communications anytime & anywhere
- **Hosted Security** – including SSL VPN to facilitate remote communications

Additional Cloud services

Let us help you migrate to the Cloud. Whether public or private, hSo's data centre platforms enable the implementation and safe delivery of Cloud-based services for you.

These include:

- **Co-location**
- **Server Virtualisation**
- **Storage & Backup**
- **Security**
- **Cloud Peering**

7 key benefits of hSo's network services

Superior Uptime
By using 20+ data secure data centres, many IP transit providers, rigorous SLAs, and triple ISO certified processes.

24/7 Fully Managed & Monitored
Our own engineers will proactively monitor your network and are always there for support.

Multi-Carrier Resilience
By combining tail circuits from different network operators, and providing failover circuits.

Best Technology For You
We are technology agnostic and use all proven circuit types.

Transparent Pricing
By comparing all UK carriers in real-time with our unique online quoting tool.

Speed To Suit Your Needs
Full range of bandwidth options, from 2Mb to 10Gb.

Seamless Convergence
Data, voice, video and apps co-exist via our use of QoS.

'From the very inception of hSo back in 2000, the provision of reliable, cost-effective network services has been the foundation of our business'
